PRESENTING

Recent Achievements

of the

LESLIE BELL SINGERS

ACCLAIMED by leading critics as the Continent's finest girl chorus, The Leslie Bell Singers have added new laurels to their international fame in the past year. Their brilliant triumph, the Canadian General Electric radio show, listened to each Sunday evening by over one million Canadians, has won enthusiastic praise in the United States from both the radio public and major network officials.

Last fall the Bell Singers were heard with foremost Hollywood stars in a 13-week broadcast series over 500 American radio stations.

The Leslie Bell Singers' recent motion picture, released simultaneously with the C.G.E. radio series, has had a long run in London, England, and in New York City where the Singers have been invited to make a personal appearance this summer. They are soon to make their debut for RCA Victor in an album of recordings.

Capacity Houses Greet Leslie Bell Singers . . .

Capacity audiences have greeted the Bell Singers during their concert tours this season when many houses have been sold out three months in advance. It is suggested that tickets be procured early for this unrivalled choral group to whom Gilbert Chase, NBC Musical Director in New York paid the tribute, "If there is a better female choir than the Leslie Bell Singers, I have not heard it."
